PROFESSIONAL SUMMARY

Software Engineer with 2 years of professional experience building cross-platform apps in React Native and Flutter, now shipping web with Next.js. Maintains **Safco eCredit**, a live fintech app with **5,000+ Google Play downloads**, and independently built **MediQ**, a multi-clinic SaaS (Next.js web + React Native mobile) on Supabase/PostgreSQL with Row-Level Security on all 37 tables and **1,600+ automated tests**. Currently leading a NASA Space Apps 2026 team. Works with AI-assisted development tools (**Claude Code, Cursor, Codex, Google Antigravity**) to speed up debugging and testing, while reviewing and owning every change that ships.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Dart, SQL (PostgreSQL, PL/pgSQL)

Mobile: React Native (CLI), Flutter, Android, iOS, React Navigation, Reanimated

Web: Next.js (App Router), React, Tailwind CSS

State & Forms: Redux Toolkit, Zustand, TanStack React Query, React Hook Form, Zod, GetX

Backend & Data: Supabase (Auth, RLS, RPC functions, Realtime, pg_cron), Firebase (Auth, Firestore, FCM), SQLite, REST APIs

Testing & Delivery: Jest, Playwright, pgTAP, Git, GitHub Actions, CI/CD, Play Console, Agile/Scrum, code reviews

WORK EXPERIENCE

Software Engineer (React Native) — Sep 2025 – Present

Verge Systems (WebHR) — Karachi, Pakistan

- Ship and maintain Safco eCredit, Safco Support Foundation's loan-servicing app on Google Play (loans, repayments, history).
- Built loan form workflows and field-level case-revert logic on SQLite so loan data stays available without a network connection.
- Own Redux Toolkit state management and REST API integration that connect mobile features to backend business logic.
- Fix Android build and Gradle issues and manage Play Console releases, working in Agile sprints with design and backend.

Software Engineer (React Native & Flutter) — Jan 2025 – Aug 2025

Algorithms Consulting — Karachi, Pakistan

- Turned product requirements and UI designs into reusable components for cross-platform React Native and Flutter apps.
- Integrated backend APIs and state management, fixed device-specific Android/iOS issues, and validated builds via CI/CD.

Flutter Developer (Contract) — Dec 2023 – Jan 2024

Bidbuyy — Jamshoro, Pakistan

- Built a bidding app with Firebase Auth, real-time Firestore data, GetX state, REST APIs and FCM push notifications.

PROJECTS

MediQ — Multi-Clinic SaaS for Appointments & Live Queues (Web + Mobile) — GitHub

Next.js 16, React 19, TypeScript, Tailwind CSS · React Native · Supabase/PostgreSQL · Playwright, Jest, pgTAP

- Built a Next.js web app (~9.9K lines TS) and a React Native app on one Supabase backend, shipped in phases: security lockdown, multi-clinic SaaS, QR join, reception, plans, and payments in production.
- Designed the database: 37 tables with Row-Level Security on every table, 126 SQL functions (80 client-callable RPCs), 34 migrations (~17.8K lines SQL) and 5 pg_cron jobs for notifications, token expiry and plan lifecycle.
- Wrote 1,600+ automated tests: 962 pgTAP database tests, 641 Jest tests and 57 Playwright E2E tests, including Urdu/English RTL layout checks on phone and desktop widths.
- E2E tests caught two production bugs the DB tests missed (UPDATE without WHERE, Next.js Suspense build failure); a backfill migration test stopped a bug cutting Pro clinics' doctor limit from 10 to 3.
- Append-only payment ledger (refunds are new rows) and atomic slot-locking RPCs that prevent double-booking.

Orbisol — NASA Space Apps Challenge 2026 (Team Lead) — In Progress · Nov 2026

React Native (Android) · NASA POWER open climate data

- Leading a two-person team building an app for the *Field Shift* agriculture challenge that turns NASA open climate data into farmer-ready insights, built on real NASA datasets and the official Space Apps brand guide.

NaviGo — Navigation App · *React Native CLI, TypeScript, MapLibre, OSRM* — GitHub

- Google Maps-style app with live GPS tracking, place search and real-time routing on a fully open-source map stack.

EDUCATION

B.E. Software Engineering — MUET, Jamshoro — Nov 2020 – Nov 2024

CERTIFICATIONS

Claude 101 — Anthropic Academy · **Data Analyst (Excel & Power BI)** — Devtown · **Communication Skills** — EduTech, Hyderabad
