PROFESSIONAL SUMMARY

Mobile engineer who takes features from UI to database, tests and Play Store release. Maintain **Safco eCredit**, a live fintech app with **5,000+ Google Play downloads**, and built **MediQ**, a multi-clinic SaaS (React Native + Next.js + Supabase) with **1,600+ automated tests**. Use AI tools (Claude Code, Cursor, Codex, Antigravity) to ship faster while owning every change.

WORK EXPERIENCE

Software Engineer (React Native) — Verge Systems (WebHR), Karachi — **Sep 2025 – Present**

- Ship and maintain Safco eCredit (**5,000+ downloads**), Safco Support Foundation's loan-servicing app on Google Play.
- Own the Redux Toolkit state layer and REST API integration that connect app screens to backend loan logic.
- Built offline-first loan forms and field-level case-revert logic on SQLite, so work continues without internet.
- Own Google Play Console rollouts and fix Android/Gradle build failures to keep production releases stable.

Software Engineer (React Native & Flutter) — Algorithms Consulting, Karachi — **Jan 2025 – Aug 2025**

- Built client app features in React Native and Flutter, turning requirements and UI designs into reusable components.
- Integrated REST APIs and state management, fixed device-specific Android/iOS bugs, and validated builds through CI/CD.

Flutter Developer (Contract) — Bidbuyy, Jamshoro — **Dec 2023 – Jan 2024**

- Built a bidding app with Firebase Auth, real-time Firestore data, FCM push notifications, GetX state and REST APIs.

EDUCATION

B.E. Software Engineering — MUET, Jamshoro · CGPA: **3.1 / 4.0** — **Nov 2020 – Nov 2024**

Mehran University of Engineering & Technology

TECHNICAL SKILLS

Mobile & Web: React Native (CLI), TypeScript, JavaScript, Next.js (App Router), React, Android, iOS, Tailwind CSS, Flutter (Dart)
State & UI: Redux Toolkit, Zustand, TanStack React Query, React Hook Form, Zod, React Navigation, Reanimated
Backend & Data: Supabase (Auth, RLS, RPC, Realtime, pg_cron), PostgreSQL, Firebase (Auth, Firestore, FCM), SQLite, REST APIs
Testing & Delivery: Jest, Playwright, pgTAP, Git, GitHub Actions, CI/CD, Google Play Console, Agile/Scrum
Currently Learning: Node.js, Express.js, Prisma ORM, Docker, DevOps (Introduction to DevOps course, in progress)

PROJECTS

MediQ — Multi-Clinic SaaS for Appointments & Live Queues (Web + Mobile) — **GitHub**

Next.js 16, React 19, React Native, TypeScript, Tailwind · Supabase/PostgreSQL · Playwright, Jest, pgTAP

- Built the Next.js dashboard and React Native app on one Supabase backend, shipped in phases up to **live payments**.
- Shipped QR-code patient join with printable QR posters, a reception desk, subscription plans and an Urdu/English UI.
- Designed **37 tables** with Row-Level Security on every table, **126 SQL functions**, 34 migrations and 5 scheduled pg_cron jobs.
- Wrote **1,600+ tests** (962 pgTAP, 641 Jest, 57 Playwright E2E incl. Urdu/English RTL) that caught **3 real bugs**.
- Built an append-only payment ledger (refunds are new rows) and atomic slot-locking RPCs that prevent double-booking.

Orbisol — NASA Space Apps Challenge 2026 (Team Lead) — **In Progress · Nov 2026**

React Native (Android), TypeScript · NASA POWER API

- Building a decision-support app for the official Field Shift: Adapting Farms with NASA Data challenge, helping farmers plan crop rotations that improve soil health under a changing climate.
- Combines NASA POWER daily climate data (rainfall, temperature, solar) with local soil and crop data to rank rotations.
- Leading a two-person team as Team Owner: app architecture, NASA data integration and submission.

NaviGo — Navigation App · *React Native CLI, TypeScript, MapLibre, OSRM* — **GitHub**

- Built a Google Maps-style app with live GPS tracking, place search and real-time routing on an open-source map stack.
