PROFESSIONAL SUMMARY

I'm a Software Engineer with production experience building cross-platform mobile apps in React Native and Flutter for Android and iOS. I've shipped and maintained apps with thousands of downloads on Google Play, working with Supabase and Firebase for authentication, real-time data, and offline-capable storage. Owning a feature end-to-end comes naturally to me — from API integration through debugging to production release — and I lean on AI-assisted tools such as Claude, Codex, Cursor, and Google Antigravity to debug faster and iterate quickly.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Dart, SQL

Mobile Development: React Native, Flutter, Android, iOS

State, Data & Navigation: Redux Toolkit, Zustand, React Query (TanStack Query), React Navigation, GetX, React Hook Form, Zod

Backend & Data: Supabase (Auth, Row-Level Security), Firebase (Auth, Firestore, Cloud Messaging), SQLite, REST APIs

Tools & Practices: Git, GitHub, GitHub Actions, CI/CD, Google Play Console, Agile/Scrum, Code Reviews

AI-Assisted Development: Claude, Codex, Cursor, Google Antigravity

Professional Skills: Cross-Functional Collaboration, Debugging & Troubleshooting, Agile Teamwork

WORK EXPERIENCE

Software Engineer (React Native)

September 2025 - Present

Verge Systems — WebHR — Karachi, Pakistan

- Ship and maintain Safco eCredit, a loan-servicing app for Safco Support Foundation (SSF) clients, live on Google Play with 5,000+ downloads, giving users visibility into approved loan amounts, repayment schedules, and loan history.
- Build loan form workflows and field-level case-revert functionality, backed by SQLite for local, offline-capable data handling.
- Lead Redux Toolkit-based state management and integrate RESTful APIs to connect mobile features with backend services and business logic.
- Deliver responsive, pixel-perfect UI for Android and iOS, working closely with design and backend teams.
- Troubleshoot Android build and dependency issues across development, testing, and deployment — including Play Console release management — to keep production releases stable.
- Follow Git-based workflows, take part in code reviews, and contribute to Agile sprint planning.

Software Engineer (React Native & Flutter)

January 2025 - August 2025

Algorithms Consulting — Karachi, Pakistan

- Contributed to cross-platform mobile applications built with React Native and Flutter for Android and iOS, turning product requirements and UI designs into reusable components.
- Integrated backend APIs and application state management to support feature development and resolve UI issues.

- Used version control and CI/CD practices to validate builds and keep the mobile delivery pipeline moving smoothly.
- Worked with developers and stakeholders to troubleshoot device-specific issues and keep app behavior consistent on Android and iOS.

Flutter Developer

December 2023 - January 2024

Bidbuyy — Jamshoro, Sindh, Pakistan

- Built a cross-platform bidding system app in Flutter with Firebase Authentication for secure login and Firestore for real-time data.
- Implemented GetX for state management and designed responsive UIs across screens.
- Connected REST APIs for dynamic content fetching and configured Firebase Cloud Messaging (FCM) for push notifications.
- Optimized app performance for a smooth, consistent experience across both platforms.

PROJECTS

Safco eCredit — *React Native CLI, SQLite, Redux Toolkit*

- Production React Native app for Safco Support Foundation (SSF), live on Google Play with 5,000+ downloads.
- Structured the loan form workflows and field-level case-revert logic, with SQLite handling offline-capable local storage.
- Google Play: play.google.com/store/apps/details?id=com.vergesystems.safco_e_banking

QueueLess — *React Native CLI, Supabase*

- Appointment and queue management app for clinics that replaces physical waiting with real-time slot booking and live queue status updates.
- Designed a three-role architecture (Client, Staff, Admin) with role-based navigation via a custom app_role JWT claim set through a Supabase Custom Access Token Hook.
- Built token-based OPD queue management with per-doctor queue selection, enforced by Supabase Row-Level Security (RLS) policies across all three roles.
- GitHub: github.com/Awais-Chandio/QueueLess

FoodApp — *React Native CLI, SQLite, Role-Based Access*

- Food ordering app with a two-role architecture separating Admin and Customer interfaces, each with distinct permissions and navigation flows.
- Handled offline-capable order and menu management with SQLite, alongside an Admin panel for product management, order tracking, and user control.
- GitHub: github.com/Awais-Chandio/FoodApp

EDUCATION

B.E. Software Engineering

Nov 2020 - Nov 2024

Mehran University of Engineering and Technology (MUET) — Jamshoro, Pakistan

CERTIFICATIONS & ACHIEVEMENTS

- Claude 101 — Official Certificate, Anthropic Academy
- Communication Skills Certification — EduTech, Hyderabad (Prime Minister's Program)
- Data Analyst Certification (Microsoft Excel & Power BI) — Devtown
